The Art of Engineering

It’s not just a fly rod, it’s our OBSESSION.

Thomas & Thomas rods are more than dual-helical, high modulus graphite, premium Portuguese cork, machined aerospace grade aluminum, and nickel silver components. Every T&T rod is the culmination of 40 years on the water, testing cutting-edge ideas; 40 years analyzing the engineering of taper design and material science; and 40 years raising research and development to an art form.

Decades of investment in science, people and process with one focus: to create the finest, most technologically superior fly rods in the world – rods that turn your time on the water into memories passed down for generations.

Fly fishing and the art of rod making inspired Tom Doney to co-found Thomas & Thomas Rodmakers. That inspiration has taken Tom on a 40-year journey of design, development and creation with a passion that still burns to this day. His unique vision has led Thomas & Thomas to the forefront of fly rod design.

Over four decades at Thomas & Thomas our passion has helped define the history of fly fishing through both our dedication to craftsmanship and to the cutting-edge, pioneering technology that is at the very heart of the company. It’s the combination of material science and our obsession for inspired rod design that makes Thomas & Thomas fly rods the world’s finest. We make rods that help you intuitively cast nine feet to ninety feet, with actions uniquely designed into each series that synthesise the latest science with knowledge from a lifetime on the water. The T&T feel, the special magic of every rod that Tom designs, is why owning a Thomas & Thomas fly rod is so remarkable.

Pick up a dual-helix graphite Apex, Helix, Whisper Lite, Horizon II or Paradigm and you will be holding a work of art. Every T&T rod has a flawless finish, precisely aligned snake and stripping guides, hand-sanded grip and a reel seat made with the finest components in the industry. We build eight distinct graphite rod series that target the widest range of casting styles – over one hundred models – each with a unique taper tailored to its line weight. And one rod that is perfectly matched for your favorite spot.

Anglers, especially fly fishermen, are a breed apart: always searching for maximum performance, but at the same time respectful of the past. Pick up a T&T rod today, become part of the history, experience the performance and passion that is Thomas and Thomas.

thomasANDthomas.com
1969 was a special year: man first set foot on the moon, it was the year of Woodstock, and the genesis of Thomas & Thomas Rodmakers. To celebrate our 40th anniversary, T&T is offering a special limited edition series of graphite fly rods: forty 9’ #5 weight, hand-numbered trout rods, and forty 13’ #8 weight, hand-numbered spey rods, all of 4-piece construction.

The theme of this series is inspired by the 40th anniversary stone, the ruby. In keeping with this, the rod shaft is a deep, translucent ruby red. It is complemented by red agate stripping guides and deep red guide wraps, with silver accents.

The aesthetics of our series is in kind with our bamboo rods: nickel silver reel seats, coupled with highly figured and richly varnished walnut reel-seat spacers. Each rod comes with an extra tip and is packed in a hand-crafted leather case.

The Offering:

Nine Foot, #5 Weight, 4-Piece Trout Rod, With Extra Tip – Serial Numbers One of Forty through Forty of Forty

Price $1500.00

Brace of two rods (One Trout, One Spey) may be reserved with matching serial numbers.

Price, matched serial-numbered brace $3950.00

To protect our Anniversary Collector’s Rods we’ve chosen the finest hard leather cases available, hand-made by Arne Mason of Ashland, Oregon. Using traditional European hand-stitching and western saddlery techniques, his distinct personal style is classic and uncompromisingly clean. With hand-mitered French edges, Mason’s work continues to set the standard by which the fly-fishing industry’s leather work is measured. Arne uses the finest, most durable leather – grade A English Bridle, tanned in the USA. Each case interior is hot-stuffed with natural oils and the surface is waxed, making it the traditional choice for outdoor use.
To complete our 40th anniversary celebration T&T is also offering a limited edition series of forty 13’ #8 weight spey rods. Each rod is hand-numbered, and all are 4-piece construction.

As with our anniversary Trout Series, our limited edition Spey has a deep translucent ruby shaft complimented by red agate stripping guides and deep red guide wraps and silver accents.

Each rod is fitted with a nickel silver reel seat, coupled with highly figured and richly varnished walnut spacers. Every rod in the series comes with an extra tip and is packed in a hand-crafted Arne Mason leather case.

The Offering:

Thirteen Foot, #8 Weight, 4-Piece Spey Rod, with Extra Tip – Serial Numbers One of Forty through Forty of Forty.

Price $1950.00

Brace of two rods (One Trout, One Spey) may be reserved with matching serial numbers.

Price, matched serial-numbered brace $3950.00
SWITCH Rods
Fast Action, 6-7 wt.

Thomas & Thomas Switch Rods - designed from the ground up for single and two-handed casting. Outstanding for the steelhead and trout angler who needs to cover lots of water, make precise mends and send big flies long distances. Its high modulus graphite gives Switch a smooth, fast recovery that makes for relaxed, powerful, all day casting. T&T rod designer, Tom Dorsey put two years into the development of Switch and the result is a tough, versatile rod that performs flawlessly cast after cast.

- Fast recovery – easy load design for effortless double-handed and overhead casting.
- Premium quality, hand-sanded, Portuguese cork grip.
- Aerospace grade, hard anodized, machined aluminum reel seat with double lock nuts.
- Low friction, oversized snake and carbide stripping guides.

Handle and Reel Seat: All rods are furnished with a salt-proof, anodized aluminum reel seat and two-handed grip.

thomasandthomas.com
Smooth Progressive Action, 3-6 wt.

The Thomas & Thomas Whisper-Lite Series - engineered for exceptional line feel, outstanding casting range and for hard-core trout bums who know the value of consistent, flawless presentations. Whisper-Lite has a relaxed casting rhythm, a smooth progressive taper, and a classic recovery. Its magical line trajectory puts your favorite fly closer to your fish of a lifetime. Available in lengths 7½’-9’, for lines 3 through 6 weight; all models are four-piece construction.

- Smooth, progressive action rods for delicate, accurate casting.
- Premium quality, hand-sanded Portuguese cork with Western grip.
- Aerospace grade, anodized bright machined aluminum with up-locking reel seat and bubinga wood spacer.
- Low friction, snake and silicone carbide (sic) stripping guides.

Handle and Reel Seat: Western grip and bright polished screw-lock seat with bubinga wood spacer.
Our Double Handed Rods have a classic progressive taper designed to maximize your Single Spey, Spiral Cast, Double Spey, or Circle C. Outstanding for heavy shooting head lines, bulky flies, and big water. Its smooth crisp action will load fast and shoot far, with enough delicacy to turn over a #8 Stone fly.

Whether you’re on the hunt for giant Atlantic salmon on the Kola Peninsula, Baltic salmon in Scandinavia or steelhead on classic North American rivers, elegantly crafted Thomas & Thomas two-handed rods are designed to exceed the expectations of today’s obsessed Spey anglers.

> Smooth, fast recovery – easy loading rods for effortless spey casting.
> Premium grade Portuguese cork double-handed grip.
> Aerospace grade, hard anodized, machined aluminum reel seat with double lock nuts.
> Low friction, oversized snake and carbide stripping guides.

Handle and Reel Seat: All rods are furnished with a salt-proof anodized aluminum reel seat and two-handed grip.

Photo: Tom Dorsey, T&T co-founder and rod designer, with his legendary Double Handed 13’, 7 wt. Taken July 14, 2009, Poker Pool on the Restigouche River, New Brunswick, Canada.
**APEX**

Fast Action, 6-12 wt.

Apex is designed for technically skilled anglers—guy's after Florida tarpon, bones, snook or big Northeast stripers. If you're in this club, you know all about pounding wind and the need for a supercharged rod with the line speed to beat it back.

> Unsanded, unpainted blank dramatically increases wall strength.
> Premium grade Portuguese cork grips.
> Highly compressed dual-helical graphite.
> Proprietary epoxy resin produces an ultra hard, nick resistant, wind cutting finish.
> Low friction, oversized snake and silicone carbide (sic) stripping guides.

### Handles and Reel Seats: All Apex models are built with a Full Wells grip, and T&T's custom saltwater seat, and with ebony toned salt-proof spacer and bright anodized mechanics.

**HORIZON II**

Fast Action, 3-13 wt. and a 14-16 wt.

Built with T&T's exclusive Bi-Angular Fiber Technology (BAFT), the Horizon II Series feels lighter and more responsive than other high-performance rods. But the reason Horizon IIs have so many fans is crystal clear on the first cast. The HII dual-helical graphite fibers are aligned with laser accuracy, enhancing the transfer of energy throughout your cast, producing an unmatched level of line feel. Enhanced line feel magnifies the rod load allowing you to intuitively step on the power with split-second timing. Result: tight loops, power, and unmatched distance.

### Handles and Reel Seats: Rods with line weights 3-6 wt. are fitted with a Western grip and up-locking screw reel seat and black anodized fittings with a bubinga wood spacer. 7 wt. and higher rods are fitted with a Full Wells grip, black salt-proof up-locking anodized reel seat, cork fighting butt extension, and oversized snake and stripping guides. S-models through 9 wt. feature a 1 1/2” fighting butt, 10 wt. and higher use a 2”.

HELIx
Medium Fast Action, 3-12 wt.

Whether you’re on the water one day or 200 days a year, Helix rods are limitless in meeting the difficulties of extreme conditions. They load and cast with a short line, making accurate and quiet presentations, and excel at the longest possible shots on the windiest day. The experienced caster will notice the subtle softening of the Helix taper. Its medium fast action, combined with our (BAFT) fiber orientation, provides high line speed while preserving a sensation of line loading that’s almost transcendent.

Handles and Reel Seats: 3-6 wt. rods are fitted with a Western grip and an up-locking pewter anodized reel seat with bubinga wood spacer. 7 wt. and higher are fitted with a Full Wells grip. Rods with the “S” designation have a salt-proof reel seat and fighting butt extension.
VECTOR

Fast Action, 3-9 wt.

Vector is a T&T powerhouse for anglers who prefer a three-piece rod. Its fast action taper and high line speed was developed for a modern compact casting style – for guys who fish modest to big water and distance cast with quick smooth acceleration. And, true to their name, Vectors produce blinding line speed, tight loops, and laser-like trajectories.

Vector’s oversized guides and tip tops are diamond-polished to reduce line friction. Its low profile and feather light swing weight complete Vector’s high-performance package.

Handles and Reel Seats: 3-6 wt. rods feature a Western grip and Arctic blue anodized up-locking reel seat with wooden inserts. 7 wt. and higher rod appointments include a Full Wells grip and Arctic blue anodized up-locking salt-proof reel seat with double-locking rings.

Our Vector Series are available by special order. Please allow 2-4 weeks for rod completion and delivery to your authorized T&T dealer.

PARADIGM

Smooth Progressive, 3-6 wt.

The action of our Paradigm Series reaches back to the poetry of fly casting. These are rods for discriminating anglers who delight in the art of presenting flies to wary trout. But what truly separates the Paradigm from every other small creek rod is its extreme tip sensitivity. Paradigm’s full-flex taper and fine tip diameter transmit the softest take from the smallest trout from line to hand.

This delicate design loads effortlessly while generating smooth, narrow loops in a full range of casting distances. Whether you’re laying down a #18 dry, or dead-drifting emergers in meandering currents, Paradigm feels the take… it’s a graphite rod with the soul of bamboo.

Handle and Reel Seat: Western grip and bright polished screw-lock seat with bubinga wood spacer.

Our Paradigm Series are available by special order. Please allow 2-4 weeks for rod completion and delivery to your authorized T&T dealer.
Thomas & Thomas Individualist bamboo rods have been the hallmark of the rod maker’s art for more than four decades. They have earned worldwide acclaim and are prized by serious anglers who appreciate the investment of a lifetime. Thomas & Thomas rods have been thoughtfully chosen as gifts for royalty, heads of state, and captains of industry. Each rod receives the individual attention of Tom Dorsey, T&T’s master craftsman, right down to the smallest detail. They feature a hand-rubbed, high-gloss varnish finish, hand-wrought nickel silver reel seats with burled walnut spacers, and the finest quality Portuguese cork grips. The unparalleled quality of these rods extends to such fine details as the gently sculptured sliding band on the reel seat, and the ultra-fine jeweler’s knurl at the edge of the sliding ring.

Individualist™ - Our finest bamboo fly rods are designed with a complex taper that turns from a delicate tip top to the distinctive T&T swelled butt, and comes with an extra tip. Built from the finest individually selected Tonkin cane, the flamed bamboo is complemented by medium brown and translucent guide wraps at the tip top and ferrules.

Classic Series - These bamboo fly rods are a two-piece straight butt design. Each is appointed with cinnamon colored wraps, hand-rubbed finish, and nickel silver reel seat components.

Appointments

Rods for #2, #3 and #4 lines feature a nickel silver butt cap and oxidized black sliding ring, with burled walnut reel-seat spacer and Cigar grip.

Rods for #5, #6, #7 and #8 lines are fitted with hand-buffed nickel silver up-locking reel seat, mortised burled walnut spacer and Western grip.

Each rod comes with an aluminum tube finished with precision-machined nautical brass fittings.

Individualist Grilse and Salmon models are provided with a 2” detachable fighting butt.

Individualist Collector Grade rods have two mirror image tips, made from the same culm of bamboo with identical node positioning.
Meet the T&T Pro Staff. They live and breathe the sport, and they’re often the ones who push the boundaries as top guides and instructors. So when we need feedback on rod design these are the gurus we call. In fresh or salt our T&T Pro’s are making it happen every day and helping make our rods the very best in the world.
